|----------------------|---------------------------------|
| <b>Date</b>          | 15 July 2026                    |
| <b>Team ID</b>       | SWTID-2026-1518                 |
| <b>Project Name</b>  | Credit card Approval Prediction |
| <b>Maximum Marks</b> | 2 Marks                         |

### Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

| Phase of Journey                                                     | Stage 1: Application                                        | Stage 2: Prediction                             | Stage 3: Result                                                |
|----------------------------------------------------------------------|-------------------------------------------------------------|-------------------------------------------------|----------------------------------------------------------------|
| <b>Actions (What does the customer do?)</b>                          | • Enters personal details<br>• Fills application form       | • Submits application<br>• Waits for prediction | • Views approval/rejection<br>• Decides next action            |
| <b>Touchpoints (What part of the service do they interact with?)</b> | • Web application form<br>• Input fields                    | • Flask backend<br>• ML prediction model        | • Result page<br>• Predict Again option                        |
| <b>Customer Thoughts (What is the customer thinking?)</b>            | • "Am I eligible?"<br>• "Did I enter everything correctly?" | • "How is my application evaluated?"            | • "Why was it approved/rejected?"                              |
| <b>Customer Feelings (What is the customer feeling?)</b>             | • Hopeful<br>• Curious                                      | • Anxious<br>• Excited                          | • Happy (if approved)<br>• Disappointed (if rejected)          |
| <b>Process Ownership (Who is in the lead on this?)</b>               | • Customer                                                  | • ML System & Flask Application                 | • System displays result<br>• Customer reviews outcome         |
| <b>Opportunities (How can we improve this stage?)</b>                | • Simplify the form<br>• Add input validation               | • Faster prediction<br>• Progress indicator     | • Explain prediction<br>• Suggest improvements after rejection |
